

Cyma Technologies, Inc.

AMI Acoustic Meridian Intelligence

Student Practitioner Policies

The training offered by **Cyma Technologies**, also known as **Cymatics Technologies, Inc.**, is exclusive to our company and specific to our devices. We provide certification to students who study our knowledge base and techniques. In order to receive certification, students must prove their ability to utilize this knowledge with skill, coupled with a desire for excellence in improving people's health with therapeutic sound. All levels of practitioners are expected to act in a professional manner, with respect and compassion, as ambassadors of the therapeutic sound field.

Please note that the content of this training is not to be interpreted as medical advice. The information taught is based on the tenets of Cymatic therapy and is offered as a Level One training on the use of the AMI 850 Acoustic Meridian Intelligence device. If you have a serious medical condition, unexplainable or unusual symptoms, please consult your healthcare provider. The AMI 850 is a therapeutic sound device and is not for use in emergency medical situations, nor are practitioners certified to provide this level of treatment.

As a Level One Certified Cymatherapist with the AMI devices, you are required to practice within the guidelines of your training and level of expertise. The AMI 850 is a remarkable device—however, there is no therapy nor device that works for every person and every disease process. If you have any questions about your protocols or the use of the device, please contact our company.

Cyma Technologies reserves the right to deny any person admittance to any of our Training Courses or continuing education Master Classes and suspend the training, if necessary, for the following reasons:

If students conduct themselves in a way that negatively impacts the Staff, Administrators, other Students, patients or clients, not limited to but including: disruptive behavior, inappropriate language in communications, or sexual harassment, they will be contacted by the Cyma Technologies Advisory Board and given notice that a complaint has been filed. Any additional complaints will result in dismissal from the training.

Students and Practitioners must be able to represent the company in a professional manner. This includes the ability to provide the therapy to clients and patients using appropriate language regarding our products and techniques. Working with the mentorship of one of our Advanced Therapists is strongly encouraged until full Certification is awarded.

Each student is given three free hours of consultation time with our staff in order to ensure that all questions are answered. These consultations can also be used to develop your personal protocols. Please make use of this invaluable gift.

****For security and safety reasons, our Practitioner list is not published on the website. After certification, if someone contacts our company requesting a practitioner, our staff will make the referral as long as your liability insurance is current, you have completed your studies and have no formal complaints filed against you.*

Practitioners who plan to offer the therapy, professionally or while in training, are required to have to have Liability Insurance. Those practitioners who would like to be on our referral list must provide and keep current this information to the **Cyma Technologies** office.

****Some AMI 850 Basics** practitioners may have liability insurance through other licensure, but it is important to be sure that their particular company covers sound therapy. Cyma Technologies recognizes participants in the AMI 850 Certification Program in the following ways:

Student Practitioner or Certified Cymatherapy Practitioner

This in no way implies that you are affiliated with Cyma Technologies as an employee, advisor, or research associate.

All frequencies and their specific patterning, as well as the *AMI—Acoustic Meridian Intelligence* devices and concepts, and Soundflower products are the intellectual property of **Dr. Mandara Cromwell** and **Cymatics Technologies, Inc**—to include:

Any cymatic images, website components, pamphlets, brochures, or digital media. No method of distribution, particularly any commercial usage of these materials, is considered legal without express consent from **Cyma Technologies**.

The training materials that you have purchased are for your exclusive use and the furtherance of your own education. No refunds will be issued for the application fee, nor tuition costs, once the materials have been received by the student.

All **Cymatics Technologies, Inc.** products are patented, trademarked or copyrighted according to the USPTO and other international governing bodies. In addition to the written materials, we provide “Zoom Study Groups,” for the purpose of lecturing on information that is not in the manual. These meetings are a “bonus” and are not formally listed as part of the course description. The lecture/study sessions, which may be pre-recorded or live, will be sent to the student practitioners following the Zoom Study Groups. Questions regarding the training are to be submitted at any time via email or addressed in the free phone consultations provided for each student.

Neither student nor Certified Practitioners may diagnose, treat nor profess to cure any illness while using the **AMI—Acoustic Meridian Intelligence** devices. Our devices are categorized as FDA Class 1, to relieve stress and pain. All twenty channels were designed to achieve those health goals through eliminating the underlying causes of disease and supporting the major systems of

the body and its functionality. As a Certified Cymatherapist with the **AMI 850** device, you will be trained to educate your clients in this manner.

Cyma Technologies, Inc. will issue certifications as students complete their required studies, which must be submitted within the required time limit. Students unable to complete their studies will be required to negotiate an extension, which cannot exceed a three-month period. No Certification will be awarded, nor attendance at any forum or ceremony will be permitted without the full completion of the course.

Each student must take responsibility for reading and understanding the information contained in this Student Practitioner Policy document; as well as committing to the policies put forth by **Cyma Technologies**.

Thank you for being a part of the sound solution so many people are looking for!
